**“Breathaway”**  
(John Woog Johnson)

I saw you last night  
But the timing wasn't right  
People stay people leave  
Many places many needs  
Then I passed a familiar place  
I turned and we were face to face

Chorus:  
But the words just blew away  
Every time it's the same  
You always take my breath away  
I hope I see you again

Singing blues at 2am  
Wonder if you'll come, and then  
I keep looking toward the door  
People swaying on the floor  
As I'm searching for what to say  
I see you wave and walk away

Chorus:  
But the words just blew away  
Every time it's the same  
You always take my breath away  
I hope I see you again

In my dreams I always know  
What to say and where to go  
I'm not normally this shy  
There must be a reason why  
That I keep acting this way  
You always take my breath away
