**Venus**  
by John Johnson

Verse:

I got a mighty feeling coming down like a water fall  
Filling empty chambers I didn't think I'd use at all  
I've got seismic vibrations that make all the meters move  
Shouldn't make much sense cause there's only about five feet of you

Chorus:

Hippie lady are you from a distant star  
No matter where you go there you are

Verse:

I've been talkin' to my friends, "What's happening to me here"  
burning lasers every time that you are near  
You've got my organs pumping you make reality shift  
Every thirty seconds I think I need some more of this

My eyes are

Chorus:

Verse:

I'm riding to your homeland on a horse with golden hair  
At every new horizon I'm praying god I hope she's there  
The first time that I saw you was underneath a cloudless sky  
I see your eyes among the millions that are always passing by

Chorus:
